دای‌کی
DAYCHE

This course covers fundamental data science concepts, terminology, and applications using the CRISP-DM methodology and real experiments. Participants use ChatGPT and Kaggle for interactive learning, tackling data science problems and basic statistical concepts. They also dive into practical Python programming, focusing on essential data science libraries for effective analysis and problem-solving.
The goal of this course is to give learners a comprehensive introduction to the field of data science, equipping them with the necessary knowledge and skills to pursue further studies or embark on a data science career.

13 / 02 / 2025

This is to certify that

Samane Najarian

has successfully completed the 40-hour training course on the subject of "Dive into Data Science".

We're confident that the skills and knowledge gained from this training course will guide and support their future career endeavors. We hope for their ongoing success and believe that what they've learned here will play a pivotal role in their professional growth.

DAYCHE knows data psychology; Congratulations on yours as a new Daycher in the world!
